

Photon

QA-Tester (m/f/d) in Berlin

Your Tasks:

- You will carry out incoming goods inspections.
- Carry out quality inspections in accordance with inspection plans for industrial production processes, including dimensional checks on welded assemblies and individual parts. Ideally, you will have VT/PT qualifications for complete inspections or random sampling.
- You will create detailed measurement reports.
- Complaint processing is also one of your tasks.

Your profile:

- Completed training in the metalworking industry.
- Experience in quality management.
- Confident handling of manual measuring equipment; ideally experience with MS Office applications.
- High quality awareness, ability to work in a team and flexibility; independent working style.
- Language skills: German, English (desirable).

Our offer:

- An interesting and varied working environment awaits you.
- Flat hierarchies and collegial cooperation create a family atmosphere.
- You benefit from a wide range of further training opportunities.
- 30 days vacation per calendar year.
- Good public transport connections and free employee parking are available to you.
- Part-time employment possible.
- Participation in community-promoting company events.
- Company pension scheme and BVG company ticket/job bike round off our benefits.

In Berlin, we use unique laser welding technology to develop, optimize and produce complex lightweight components and assemblies made of steel, stainless steel and aluminum for future-oriented and sustainable mobility.

Become part of the Photon family, develop your personal potential and shape global projects with us!

We look forward to receiving your complete application, stating your earliest possible starting date and your salary expectations.
